

Review 1/21/17
WAT

Wetlands Bureau Decision Report

Decisions Taken
01/13/2014 to 01/19/2014

DISCLAIMER:

This document is published for information purposes only and does not constitute an authorization to conduct work. Work in jurisdiction may not commence until the applicant has received a posting permit.

Decisions are subject to appeal, and are reviewed by the federal agencies for compliance with Section 404 of the Federal Clean Water Act.

APPEAL:

I. Any affected party may ask for reconsideration of a permit decision in accordance with RSA 482-A:10,II within 30 days of the Department's issuance of a decision. Requests for reconsideration should:

- 1) describe in detail each ground for complaint. Only grounds set forth in the request for reconsideration can be considered at subsequent levels of appeal;
- 2) provide new evidence or information to support the requested action;
- 3) Parties other than the applicant, the town, or contiguous abutters must explain why they believe they are affected; and
- 4) Be mailed to the DES Wetlands Bureau, PO Box 95, Concord, NH 03302-0095.

II. An appeal of a decision of the department after reconsideration may be filed with the Wetlands Council in accordance with RSA 482-A:10, IV within 30 days of the department's decision. Filing of the appeal must:

- 1) be made by certified mail to George "Chip" Kimball, Chairperson, Wetlands Council, PO Box 95, Concord, NH 03302-0095 (a copy should also be sent to the DES Wetlands Bureau);
- 2) contain a detailed description of the land involved in the department's decision; and
- 3) set forth every ground upon which it is claimed that the department's decision is unlawful or unreasonable.

MAJOR IMPACT PROJECT

2008-02082 TARRYTOWN REAL ESTATE HOLDINGS, RICHARD ELWELL
LONDONDERRY Unnamed Wetland

Requested Action:

Request permit time extension.

Conservation Commission/Staff Comments:

The Londonderry Conservation Commission voted to recommend approval of the application "subject to the completion of the sale of the Colby-Litchfield property "(36 acre mitigation parcel).

Inspection Date: 10/20/2008 by Frank D Richardson

APPROVE TIME EXTENSION:

Dredge and fill a total of 36,820 sq. ft. of low value palustrine scrub-shrub and emergent (wet meadow) wetlands for the construction a medical office facility with appurtenant parking, drainage and stormwater management structures.

Compensatory mitigation will be provided by a 36-acre parcel of undeveloped land to be placed in a Conservation Easement to be held by the Town Of Londonderry in perpetuity.

With Conditions:

1. All work shall be in accordance with plans by CLD Consulting Engineers, Inc. dated June 2008 (last revised 9/23/08), as received by DES on September 25, 2008.
2. This permit is contingent on approval by the DES Alteration of Terrain Program.
3. This permit is contingent on approval by the DES Subsurface Systems Bureau.
4. There shall be no further alteration of wetlands for lot development, driveways, culverts, for septic setback or other construction activities.
5. NH DES Wetlands Bureau Southeast Region staff shall be notified in writing prior to commencement of work and upon its completion.
6. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
7. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
8. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
9. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
10. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.
11. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.
12. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).

COMPENSATORY WETLANDS MITIGATION:

1. This permit is contingent upon the execution of a conservation easement on 36.0 acres as depicted on plans received November 19, 2008.
2. The conservation easement to be placed on the preservation area shall be written to run with the land, and both existing and future property owners shall be subject to this easement.

3. The plan noting the conservation easement with a copy of the final easement language shall be recorded with the Registry of Deeds Office for each appropriate lot. A copy of the recording from the Rockingham County Registry of Deeds Office shall be submitted to the DES Wetlands Bureau prior to the start of construction.
4. The applicant shall prepare a report summarizing existing conditions within the conservation area. Said report shall contain photographic documentation of the easement area, and shall be submitted to the DES and the grantee prior to construction to serve as a baseline for future monitoring of the easement area.
5. The conservation easement area shall be surveyed by a licensed surveyor, and marked by monuments [stakes] prior to construction.
6. The Wetlands Bureau shall be notified of the placement of the easement monuments to coordinate on-site review of their location prior to construction.
7. There shall be no removal of the existing vegetative undergrowth within the easement area and the placement of fill, construction of structures, and storage of vehicles or hazardous materials is prohibited.
8. Activities in contravention of the conservation easement shall be construed as a violation of RSA 482-A, and those activities shall be subject to the enforcement powers of the Department of Environmental Services (including remediation and fines).

With Findings:

1. The owner, authorized agent or applicant certifies that this permit qualifies for a permit extension in accordance with RSA 482-A:3, XIV-a, and Env-Wt 502.01.
2. This permit has been extended in accordance with RSA 482-A:3, XIV-a and Env-Wt 502.01.

MINOR IMPACT PROJECT

2008-00240 PARTNERS FARM LLC
HILLSBOROUGH Black Pond Brook

Requested Action:

Request permit time extension.

APPROVE TIME EXTENSION:

Dredge and fill \pm 15,079 square feet of palustrine forested wetlands for road and driveway access to a proposed 42-lot subdivision on a \pm 453.9 acre parcel (\pm 315.9 acres of the parcel will remain undeveloped) and retain \pm 3,287 square feet of palustrine forested wetland impact for a logging road and bridge crossing on Black Pond Brook for public access to the proposed conservation easement. Preserve approximately \pm 93.77 acres of the subject parcel to be deeded in fee simple to the Hillsborough Conservation Commission and preserve \pm 18.57 acres of the subject parcel to be held in conservation easement by the Hillsborough Conservation Commission (Hillsborough Tax Map 7, Lot 119).

With Conditions:

1. All work shall be in accordance with plans by SVE Associates dated January 29, 2007, and revised through January 22, 2009 as received by the Department on January 27, 2009.
2. This permit is contingent on approval by the DES Alteration of Terrain Program.
3. This permit is contingent on approval by the DES Subsurface Systems Bureau.
4. All activities shall be in accordance with the Comprehensive Shoreland Protection Act, per RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland after July 1, 2008.
5. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for septic setback.

6. The deed which accompanies the sales transaction for each of the lots in this subdivision, excluding the remaining \pm 247.9 acre parcel located south of Black Pond Brook, shall contain condition # 5 of this approval.
7. This permit shall not be effective until it has been recorded with the Registry of Deeds Office by the Permittee. A copy of the registered permit shall be submitted to the DES Wetlands Bureau.
8. Any future impacts to areas under the jurisdiction of the DES Wetlands Bureau on the remaining \pm 247.9 acre parcel including Black Pond Brook will require a full delineation in accordance with Env-Wt 301.01 for the entire parcel.
9. The Starboard Drive, Black Pond Brook Drive and Boathouse Way right-of-way use shall be limited to public access to conservation areas. Change in use shall require a new application and approval by the DES Wetlands Bureau.
10. Work shall be done during low flow conditions.
11. Work shall be conducted in a manner so as to minimize turbidity and sedimentation to surface waters and wetlands.
12. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
13. Orange construction fencing shall be placed at the limits of construction within or directly adjacent to wetlands or surface waters to prevent accidental encroachment on wetlands.
14. Dredged material shall be placed outside of the jurisdiction of the DES Wetlands Bureau.
15. Proper headwalls shall be constructed within seven days of culvert installation.
16. Culverts shall be laid at original grade.
17. The contractor responsible for completion of the work shall utilize techniques described in the DES Best Management Practices for Urban Stormwater Runoff Manual (January, 1996) and the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire (August, 1992).
18. Within three days of final grading or temporary suspension of work in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.

Wetland preservation:

19. This permit is contingent upon the execution of a conservation easement to be held by the Hillsborough Conservation Commission on \pm 8.77 and \pm 9.7 acres as depicted on plans received November 04, 2008.
20. This permit is contingent upon the transfer of \pm 25.77 and \pm 68 acres to be deeded in fee simple to the Hillsborough Conservation Commission as depicted on plans received November 04, 2008.
21. This permit is contingent on receipt and approval by the DES Wetlands Bureau of the final deed language for the transfer of the \pm 25.77 and \pm 68 acres prior to the start of construction.
22. This permit is contingent on receipt and approval by the DES Wetlands Bureau of the final conservation easement language for the \pm 8.77 and \pm 9.7 acre easement areas prior to the start of construction.
23. This permit is contingent upon receipt and approval by the DES Wetlands Bureau of the forestry management plan for conservation areas deeded to or held by the Hillsborough Conservation Commission prior to construction.
24. The conservation easements to be placed on the preservation areas shall be written to run with the land, and both existing and future property owners shall be subject to this easement.
25. The plan noting the conservation easement with a copy of the final easement language shall be recorded with the Registry of Deeds Office for each appropriate lot. A copy of the recording from the County Registry of Deeds Office shall be submitted to the DES Wetlands Bureau prior to the start of construction.
26. The conservation easement area shall be surveyed by a licensed surveyor, and marked by monuments [stakes] prior to construction.
27. The Wetlands Bureau shall be notified of the placement of the easement monuments to coordinate on-site review of their location prior to construction.
28. There shall be no removal of the existing vegetative undergrowth within the easement area and the placement of fill, construction of structures, and storage of vehicles or hazardous materials is prohibited.
29. Activities in contravention of the conservation easement shall be construed as a violation of RSA 482-A, and those activities shall be subject to the enforcement powers of the Department of Environmental Services (including remediation and fines).

With Findings:

1. The owner, authorized agent or applicant certifies that this permit qualifies for a permit extension in accordance with RSA 482-A:3, XIV-a, and Env-Wt 502.01.

2. This permit has been extended in accordance with RSA 482-A:3, XIV-a and Env-Wt 502.01.

2012-02915 KING, ALAN/SANDRA
MOULTONBOROUGH Lake Winnepesaukee

Requested Action:

Request name change to: Alan S. King & Sandra A. King

Permanently remove an existing 6 ft. x 20 ft. 5 in. crib dock, install three 6 ft. x 40 ft. seasonal docks connected by two 6 ft. x 12 ft. seasonal walkways in a "W" shaped configuration, install two seasonal boatlifts in the westerly slips, install two seasonal personal watercraft lifts along the shoreline, construct a 700 sq. ft. perched beach with 6 ft. wide access steps through the bank on an average of 255 feet of shoreline frontage along Lake Winnepesaukee, in Moultonborough.

Conservation Commission/Staff Comments:

11/13/12 Con.Com. made site visit and recommends a plan which shows the trees which will remain once the site work is complete.

APPROVE NAME CHANGE:

Change name to Alan S. King & Sandra A. King:

162 Springhouse Ln; Spring Grove, PA 17362

Permanently remove an existing 6 ft. x 20 ft. 5 in. crib dock, install three 6 ft. x 40 ft. seasonal docks connected by two 6 ft. x 12 ft. seasonal walkways in a "W" shaped configuration, install two seasonal boatlifts in the westerly slips, install two seasonal personal watercraft lifts along the shoreline, construct a 700 sq. ft. perched beach with 6 ft. wide access steps through the bank on an average of 255 feet of shoreline frontage along Lake Winnepesaukee, in Moultonborough.

With Conditions:

1. All work shall be in accordance with plans by G Walker Magrauth revision dated 03/20/2013, as received by the NH Department of Environmental Services (DES) on March 22, 2013.
2. This permit shall not be effective until it has been recorded with the county Registry of Deeds Office by the Permittee. A copy of the recorded permit shall be submitted to the DES Wetlands Bureau by certified mail, return receipt requested, prior to installation.
3. This shall be the only docking structure on this water frontage and all portions of the dock shall be at least 20 ft. from abutting property lines or the imaginary extension of those lines into the water.
4. All seasonal piers shall be removed from the lake for the non-boating season.
5. No portion of the piers shall extend more than 40 feet from the shoreline at full lake elevation.
6. All seasonal boatlifts and seasonal personal watercraft lifts shall be removed for the non-boating season.
7. Dredged or excavated material shall be placed outside of the DES Wetlands Bureau jurisdiction.
8. Stone placed along the beach front for the purpose of retaining sand shall be placed above and/or landward of those rocks currently located along the normal high water line (Elevation 504.32). Those rocks existing at the normal high water line shall remain otherwise undisturbed such that the natural shoreline remains identifiable.
9. The steps installed for access to the water shall be located completely landward of the normal high water line.
10. No more than 12 cu. yd. of sand may be used and all sand shall be located above the normal high water line.
11. This permit shall be used only once, and does not allow for annual beach replenishment.
12. The permittee shall provide appropriate diversion of surface water runoff to prevent erosion of beach area.
13. Revegetation of trees, shrubs and ground covers representing the density and species diversity of the existing stand of vegetation removed for this project shall begin at a distance no greater than 5 feet landward from the beach area.
14. Appropriate siltation, erosion, and turbidity controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.
15. All activities shall be in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

With Findings:

1. This permit transfer is issued in accordance with NH Administrative Rule Env-Wt 502.02 (b).

2013-01918 CALIFORNIA FIELDS LLC
BOSCAWEN Penacook Brook

Requested Action:

Dredge and fill a total of 2,040 sq. ft. of palustrine forested wetlands, including 65 linear feet of an intermittent stream, to construct a roadway and driveway with culvert crossings to access a 38-unit multi-family condominium housing development on a 13.5 acre parcel of land.

Conservation Commission/Staff Comments:

No report or comments were received from the Boscawen Conservation Commission.

APPROVE PERMIT:

Dredge and fill a total of 2,040 sq. ft. of palustrine forested wetlands, including 65 linear feet of an intermittent stream, to construct a roadway and driveway with culvert crossings to access a 38-unit multi-family condominium housing development on a 13.5 acre parcel of land.

With Conditions:

1. All work shall be in accordance with plans by Edwin Kaminski, P.E. dated 3-14-05 (last revised 01-21-08) , as received by the NH Department of Environmental Services (DES) on July 17, 2013.
2. This permit is contingent on approval by the DES Alteration of Terrain Bureau.
3. All activities shall be in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.
4. This permit shall not be effective until it has been recorded with the Merrimack County Registry of Deeds office by the Permittee. A copy of the recorded permit shall be submitted to the DES Wetlands Bureau by certified mail, return receipt requested, prior to construction.
5. There shall be no further alteration of wetlands for lot development, driveways, culverts, or for other construction activities.
6. Proper headwalls shall be constructed within seven days of culvert installation.
7. Culvert outlets shall be properly rip rapped.
8. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
9. Within three days of final grading, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.
10. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.
11. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.
12. Work shall be done during low flow.

With Findings:

1. This is a minor impact project per Administrative Rule Env-Wt 303.03(h)&(l).
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a) Requirements for Application Evaluation, has been considered in the design of the project.

Inspection Date: 08/23/2013 by Eben M Lewis

APPROVE PERMIT:
Permanently impact 5,000 sq. ft. of an undeveloped lot in sand dune jurisdiction for the construction of a new residential dwelling.

With Conditions:

1. All work shall be in accordance with plans received by the NH Department of Environmental Services (DES) on October 3, 2013.
2. DES Southeast Region (Portsmouth Office) staff shall be notified in writing prior to commencement of work and upon its completion.
3. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and further permitting by the Bureau.
4. Orange construction fencing shall be placed at the limits of construction to prevent accidental encroachment on wetlands.
5. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
6. Extreme precaution shall be used around areas of hair hudsonia (Hudsonia tomentosa Nutt.) Impacts to this plant shall be avoided to the maximum extent practicable.

With Findings:

1. This permit transfer is issued in accordance with NH Administrative Rule Env-Wt 502.02 (b).

2013-03358 DUPUIS, DEBORAH/ROGER
CHICHESTER Suncook Lakes

Requested Action:
Dredge and fill 2,964 sq. ft. within a palustrine emergent/wet meadow wetland to construct a driveway with a 24 in. CMP culvert

crossing to access a single family house-lot on a 6.22 acre parcel of land.

Conservation Commission/Staff Comments:

12/18/13 No Historic Properties Affected.

The Chichester Conservation Commission has no objection to permitting the proposed work.

APPROVE PERMIT:

Dredge and fill 2,964 sq. ft. within a palustrine emergent/wet meadow wetland to construct a driveway with a 24 in. CMP culvert crossing to access a single family house-lot on a 6.22 acre parcel of land.

With Conditions:

1. All work shall be in accordance with plans by Rokeh Consulting, LLC dated 11-15-13, as received by the NH Department of Environmental Services (DES) on December 18, 2013.
2. This permit is contingent on approval by the DES Subsurface Systems Bureau.
3. There shall be no further alteration of wetlands for lot development, for septic setback or other construction activities.
4. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.

With Findings:

1. This is a minimum impact project per Administrative Rule Env-Wt 303.04(f).
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

2013-03389

PSNH

WHITEFIELD Unnamed Wetland

Requested Action:

Temporarily impact 25,370 square feet of wetlands for access to replace four utility poles within an existing utility right-of-way.

APPROVE PERMIT:

Temporarily impact 25,370 square feet of wetlands for access to replace four utility poles within an existing utility right-of-way.

With Conditions:

1. All work shall be in accordance with plans by Tighe & Bond, Inc. dated December 2013 as received by DES on December 23, 2013.
2. A post-construction report documenting the status of the restored jurisdictional area, including photographs shall be submitted to the Wetlands Bureau within 60 days of the completion of construction.
3. Mulch within the restoration area shall be straw.
4. Seed mix within the restoration area shall be a wetland seed mix appropriate to the area and shall be applied in accordance with manufacturers specifications.
5. Areas of temporary impact shall be restored to pre-construction conditions.
6. Appropriate siltation/erosion/turbidity controls shall be in place prior to construction, shall be maintained during construction, and remain in place until the area is stabilized. Silt fence(s) must be removed once the area is stabilized.
7. Work shall be done during frozen conditions or low flow.
8. No equipment shall enter the water.
9. The permittee shall use best management practice to minimize the likelihood of introducing invasive plants, weedy species such

as purple loosestrife (*Lythrum salicaria*) and common reed (*Phragmites australis*), into new areas.

10. Prior to the installation swamp mats shall be inspected for and removed of all vegetative matter.

11. Equipment used shall be designed to have low ground contact pressure or placed on temporary swamp mats so as to minimize rutting of the soils. Swamp mats shall be removed immediately upon completion of work in a particular area so as not to result in permanent impacts.

12. Within three days of final grading or temporary suspension of work, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.

13. Construction equipment shall be inspected daily for leaking fuel, oil and hydraulic fluid prior to entering surface waters or wetlands.

14. Faulty equipment shall be repaired prior to entering jurisdictional areas.

15. Within three days of final grading in an area that is in or adjacent to wetlands or surface waters, all exposed soil areas shall be stabilized by seeding and mulching during the growing season, or if not within the growing season, by mulching with tack or netting and pinning on slopes steeper than 3:1.

16. Where construction activities have been temporarily suspended within the growing season, all exposed soil areas shall be stabilized within 14 days by seeding and mulching.

17. Where construction activities have been temporarily suspended outside the growing season, all exposed areas shall be stabilized within 14 days by mulching and tack. Slopes steeper than 3:1 shall be stabilized by matting and pinning.

18. The contractor shall have appropriate oil spill kits on site and readily accessible at all times during construction and each operator shall be trained in its use.

19. All refueling of equipment shall occur outside of surface waters or wetlands.

20. The contractor responsible for completion of the work shall utilize techniques described in the New Hampshire Stormwater Manual, Volume 3, Erosion and Sediment Controls During Construction (December 2008).

21. Any further alteration of areas on this property that are within the jurisdiction of the DES Wetlands Bureau will require a new application and further permitting by the Bureau.

With Findings:

1. This is a minimum impact project pursuant to Env-Wt 303.04(af) Temporary impacts associated with the inspection, maintenance, and repair of existing utility lines within an existing utility right of way.

2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01

3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.

4. The project will be within an existing utility right-of-way.

5. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(b) Requirements for Application Evaluation, has been considered in the design of the project.

6. No potential vernal pools were identified during the wetlands reconnaissance.

7. The work will be completed during winter conditions.

8. No comments were submitted from the NHFG Nongame and Endangered Wildlife Program or the Natural Heritage Bureau.

9. The Conservation Commission signed the application waiving their right to intervene pursuant to RSA 482-A:11.

CSPA PERMIT

2013-00576 PETKAVICH, CHRISTINA/MICHAEL
HAMPSTEAD Wash Pond

Requested Action:
Owner submitted a revised plan January 15, 2014 to add a retaining wall on the side of the lot line.

APPROVE AMENDMENT:
Amended plans submitted January 15, 2014. Impact 7,000 sq ft in order to raze and rebuild a single family home within the existing footprint, construct a retaining wall and install a septic system located on a portion of the same lot located on the opposite side of Shore Drive.

With Conditions:
1. All work shall be in accordance with plans by Civil Construction Management, Inc. dated February 19, 2013 and received by the NH Department of Environmental Services (DES) on March 4, 2013.

2. This permit is contingent on approval by the DES Subsurface Systems Bureau.
3. No more than 18.9% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
4. At least 1,032 sq ft of the Natural Woodland Buffer beyond the primary building setback must remain in an unaltered state in order to comply with RSA 483-B:9, V, (b), (2).
5. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
6. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
7. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
8. Any fill used shall be clean sand, gravel, rock, or other suitable material.
9. All vegetation removed during the completion of this project will be replaced with equivalent vegetation within 6 months of said vegetation's removal.
10. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

2013-02774 **PELKEY, ANNE**
FITZWILLIAM **Laurel Lake**

Requested Action:

Retain impacts associated with the addition added to the existing structure.

APPROVE AFTER THE FACT:

Retain impacts associated with the addition added to the existing structure.

With Conditions:

1. Structures on this property shall be maintained as shown on the as-built plans by Ann Pelkey dated October 7, 2013 and received by Department of Environmental Services (DES) on October 17, 2013
2. All future activities on this property shall be conducted in accordance with the Shoreland Water Quality Protection Act, RSA 483-B. The owner shall be responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

2013-03383 **LENTZ FAMILY TRUST**
WOLFEBORO **Wentworth Lake**

Requested Action:

Impact 9,692 sq ft in order to replace home with a new home, install a new effluent disposal system and well, construct a garage with new driveway.

APPROVE PERMIT:

Impact 9,692 sq ft in order to replace home with a new home, install a new effluent disposal system and well, construct a garage with new driveway.

With Conditions:

1. All work shall be in accordance with plans by Folsom Design Group dated September 4, 2013 and received by the NH Department of Environmental Services (DES) on December 23, 2013.
2. This permit is contingent on approval by the DES Subsurface Systems Bureau.

3. No more than 23.15% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
4. At least 2,243 sq ft of the Natural Woodland Buffer beyond the primary building setback must remain in an unaltered state in order to comply with RSA 483-B:9, V, (b), (2).
5. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
6. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
7. No person undertaking any activity in the protected shoreland shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards established in Env-Ws 1700 or successor rules in Env-Wq 1700.
8. Any fill used shall be clean sand, gravel, rock, or other suitable material.
9. This permit shall not preclude DES from taking any enforcement or revocation action if DES later determines that any of the structures depicted as "existing" on the plans submitted by the applicant were not previously permitted or grandfathered.

2013-03386 O'NEIL, DIANE
HAMPTON Hampton River

Requested Action:

Impact 3,558 sq ft in order to replace existing structure with a new home and relocate the driveway.

APPROVE PERMIT:

Impact 3,558 sq ft in order to replace existing structure with a new home and relocate the driveway.

With Conditions:

1. All work shall be in accordance with plans by Millennium Engineering Inc. dated November 21, 2013 and received by the NH Department of Environmental Services (DES) on December 23, 2013.
2. This permit is contingent upon receiving a Wetlands Permit per RSA 482-B.
3. No more than 36.9% of the area of the lot within the protected shoreland shall be covered by impervious surfaces unless additional approval is obtained from DES.
4. The proposed stormwater management plan shall be designed, installed and maintained to effectively absorb and infiltrate stormwater.
5. All pervious technologies used shall be designed, installed and maintained to effectively absorb and infiltrate stormwater.
6. All activities conducted in association with the completion of this project shall be conducted in a manner that complies with applicable criteria of Administrative Rules Chapter Env-Wq 1400 and RSA 483-B during and after construction.
7. Erosion and siltation controls shall be appropriate to the size and nature of the project and to the physical characteristics of the site, including slope, soil type, vegetative cover, and proximity to wetlands or surface waters.
